

Quick Start Guide

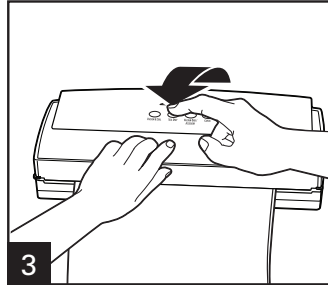

Making Bags From Bag Rolls

1 Determine size of bag needed based on size of what is being vacuum-sealed. Allow enough space for sealing top and bottom of bag. Cut to size.

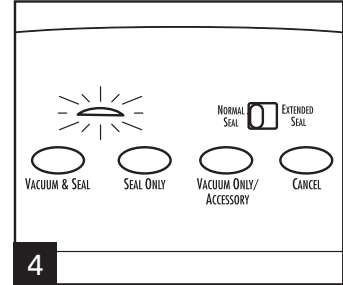

2 Center open end of bag within vacuum chamber.

3 Close and hold lid; then press Seal Only button. Continue holding lid closed during entire sealing process.

CAUTION Burn Hazard.
Seal bar is hot. Avoid touching it.

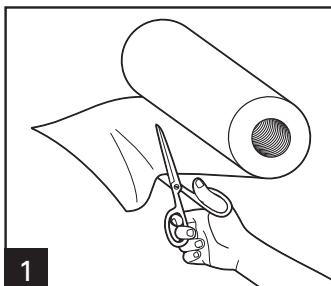

4 Wait until light turns green before letting go of lid and removing bag. Allow unit to cool 20 seconds between each use.

NOTES:

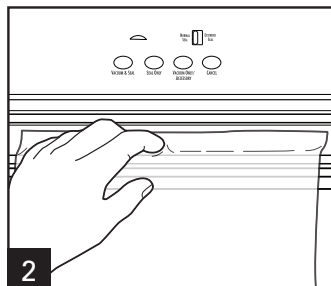

- Never open the lid during use.
- Do not let moisture into the vacuum chamber. This may damage the motor.
